

Insurance newly defined

Full regulated Insurance for global regulators and blockchain companies

Two main challenges

More regulation

is set to streamline the blockchain transformation by introducing a **regulated framework** that ensures the **security, transparency, and stability** of crypto businesses within the evolving financial markets.

Declining trust

which does **not allow** the market to grow to its **full potential**. Cases like FTX or MT Gox are causing investors to **mistrust** and **invest in other asset** classes **instead of crypto**.

Our value proposition & business model

Insurance company with a focus to

Global regulators have the opportunity to regulate blockchain companies through cooperation, instead of deposit insurance, 1B brings more trust and security to **crypto companies** and **private investors**. As a developing sector, we also target **robotic and AI** insurance.

In addition, we offer **traditional insurance products** such as legal protection, business insurance, liability coverage and more.

1B Business Cases

Regulatory Insurance

Cover all the claims that are mandatory by MiCAR-Regulations for VASP'S and other Crypto companies. Future Regulatoryies will be covered as well.

Selling

Brokering

Embedded Insurance

Retail product to driectly insure the assets of each customer from the exchanges. LOI's are already in place.

Integrated Automatism

Competitor

Decentralized Insurance

Functions like mutual insurance, with members sharing a fund. Risk: rapid capital depletion from large claims.

Property Insurance

Focuses on physical assets such as servers and mining equipment. Protects against physical damage, not covering intangible assets.

Major Insurance Player

Companies such as **Lloyds, Relm, Landmark or MunichRE**, are developing products but do not focus on embedded insurance in exchanges.

Competitor

1B Landscape

Global broker network

Our Web 3 partner network

...and many more in the pipeline

www.1b.insure
